Section 1 Introduction to the Guide

1.1 Purpose:

This operation procedure (“E-Service Guide”) provides guidance to enable the to better understand of Dubai Civil Aviation Authority (“DCAA”)related services processing and to ensure a continuous support and fully understanding of the requirements, which helps to better facilitate the customers and to ensure a compliance and ultimately safe operations related in aviation and aerodrome activities within the Emirate of Dubai. All the services highlighted in this document is approved as per Dubai executive council resolution No. (4) of 2017 Approving Fees and Fines of the Dubai Civil Aviation Authority.

1.2 Scope:

This E-Service Guide provides guidance to enable DCAA services for the customers to better understand Dubai Civil Aviation Authority E-Services related processes and requirements to ensure continuous compliance and ultimately safe operations related to aviation activities within the Emirate of Dubai.

1.3 Sector Services Overview:

This E-Service Guide contains all the approved services running under Dubai Civil Aviation Authority which it counts in total of 36 service:

- 1 Service related to Landing Permits
- 12 Services related Issuance Permits for Aviation Safety Operations
- 8 Services related to Permits for Aviation-related Activities
- 5 Services related to Approving Landing Fields
- 4 Services related to Dangerous Goods and Firearms Approvals
- 6 services related to Building Construction or Elevation Permits.

1.4 Service application flow process:

All services at DCAA have customer interphase where the customer could view and fill all the needed information and/or attach the required documentation to support his/her application process and that is done through DCAA website.

1.5 Definitions:

The following words and expressions, wherever mentioned in this E-Service Guide, will have the meaning indicated opposite each of them unless the context implies otherwise:

Term	Definition
Event/Project Name	Customer will feed the main project name of the Heliport/Helipad/ Drone operations / Event.
Type of Project	New Project or an Existing Project.
Plot number	The plot number issued by the appropriate government entity in the Emirate of Dubai (Affection Plan).
Plot Ground Level Height	The height of the project based on Vertical datum: either Above Mean Sea Level (AMSL) or Dubai Municipality Datum (DMD) is used for obstacle control process purpose. Heights in DMD are 1-meter higher than heights in AMSL.
Location of Project	The requested geofencing of a dedicated land area for the intended activity/project.
Owner Name	The name of the project owner.
Nationality	The nationality of the owner.
Mobile number	The contact number of the applicant (Preferred UAE local number).
Start & End Date and Time (UAE Time)	Starting and Ending date and time of the activity/project.
Radius (nm)	Distance from the centre of the activity location to any point that the activity impact will end in nautical miles.
Ground Level Height (Feet):	The total vertical limit of the activity, from ground level to the altitude at which it will impact the airspace.

Schedule Details	The planned schedule for the activity, especially with a long duration activity (Multiple days).
Design Manual	For landing fields, Design Manual is an assurance that the proposed landing field will comply with the physical characteristic requirements contained in GCAA CAR PART IX ADR, CAR HVD, ICAO Annex 14 Vol I/II.
Compliance Statement	A Document that states the design of the landing field are based on the regulatory requirements based on the type of landing fields and it associate regulation. Or A statement by the Landing field Operator or owner to DCAA verifying compliance with all relevant Regulations.
Safety / risk Assessment	Safety Assessment: Documentation that contains hazard descriptions, the related consequences, the assessed likelihood and severity of the safety risks, and required safety risk controls. Risk Assessment: The identification, evaluation, and estimation of the level of risk.
Landing Field for Sports and Recreational Aircraft	A defined rectangular area on a land aerodrome prepared for the landing and take-off of Sports and recreational aircraft, mostly targeting aviation flying club and hobbyist aircrafts.
Aircraft landing field	A defined area on land or water (including any buildings, installations and equipment) intended to be used either wholly or in part for the arrival, departure and surface movement of aircraft.
Non-commercial aircraft landing field	A defined rectangular area on a land aerodrome prepared for the landing and take-off, mostly targeting aviation Organisation that provides Search and Rescue, Meteorology agencies, Personal private use and any other act that are not collecting fees for using it.
Heliport for commercial	A landing field or a defined area on a structure intended to be used wholly or in part for the arrival, departure and surface movement of helicopters, that is linked to business that provide a service for fees and generate a revenue from this activity of landing field.
Non-commercial & Emergency helipad	A landing field or a defined area on a structure intended to be used wholly or in part for the arrival, departure and surface movement of helicopters, it is used mainly for activities that does not generate

	revenue or ask for fees when using them such as private personal use, humanitarian agencies, or search and rescue, Hospitals, etc..
Notice to Airmen (NOTAM)	is a notice containing information concerning the establishment, condition or change in any aeronautical facility, service, procedure or hazard, the timely knowledge of which is essential to personnel concerned with flight operations.
EASA Form 1 OR Equivalent	Document containing information about the aircraft spare part and its condition
Part Name	Name of the aircraft part or a short description
Part Number	A unique alphanumeric identifier that is used by the manufacturer for a particular aircraft part design (same number is used for all parts with the same design)
Serial Number	A unique identifier assigned to each individual part of the aircraft manufactured under the same design (different number is used for each part manufactured with the same design)
Event Letter	Letter or any other form of confirmation of participation from the event organizer
Storage Letter	Letter or any other form of confirmation of storage from the storage facility owner
Aircraft Registration	Certificate of Registration of the Aircraft/Helicopter (A certificate issued by the state of registration containing details of a particular aircraft and identifying the registered owner)
Airworthiness Certificate	Certificate of Airworthiness of the Aircraft/Helicopter (A certificate issued by the state of registration to authorize operation of the aircraft)
Operational Status	Is the transported cargo an aircraft/helicopter that can be operated OR is it a model/mock-up that is only for display purposes
Model	Aircraft/Helicopter type
Registration	Aircraft/Helicopter registration marks (Only required for operational aircraft/helicopter)
Serial	Aircraft/Helicopter Manufacturer's Serial Number (MSN)
ATA Carnet No.	An International Customs document that permits temporary importation of duty-free and tax-free goods for up to one year (If applicable)

Safety Data Sheet (SDS)	is a document that provides health and safety information about products, substances or chemicals that are classified as hazardous substances or dangerous goods.
GCAA	General Civil Aviation Authority
ICAO	International Civil Aviation Organization
IATA	International Air Transport Agency
PVT Flight	Airworthiness Certificate, Insurance certificate
Passenger Charter	General declaration flight, PAX manifest (in some cases)
Cargo Charter	General declaration flight, Air Waybill (in some cases)
Route	Flight route/destination
OPS date	Flight operation date planned
Medical Flight	General declaration flight, Patient passport, medical report...etc (in some cases)
PVT (VVIP)	Airworthiness Certificate, Insurance certificate and diplomatic clearance certificate
Military Flight	Diplomatic clearance certificate
Technical stop or crew change	Flight details – General declaration flight/crew manifest (in some cases)
Initial approval	Official document issued by licensing authority including details of activity and partners.
Trade license	Official document issued by licensing authority to business owners in order to practice commercial activity.
Passport copy	Personal identification document.
Emirates ID copy	Personal identification document.
Course Syllabus	Training program, material.
Airline landing permission	Approved document issued by DCAA to airline companies for landing request in DXB and DWC airports.

Aircraft registration certificate	Official document issued by a national aviation authority identifying the aircraft and confirms its registration with the authority.
De-registration Certificate or No-objection from oversight authority	Certificate confirming cancellation of registration of an aircraft or official e-mail/letter from the authority confirming no-objection to de-register the aircraft
Bill of Sale	Agreement confirming the sale of an asset from one party to another
FANR License	Dismantling company must have a valid license to conduct regulated activity with nuclear material granted by Federal Authority for Nuclear Regulation
NOC From Local Environment Authority	No-Objection Certificate from Dubai Municipality for the handling of waste material resulting from the aircraft dismantling project

Section 2 Resources and Useful Links

2.1 Useful Resources in DCAA website:

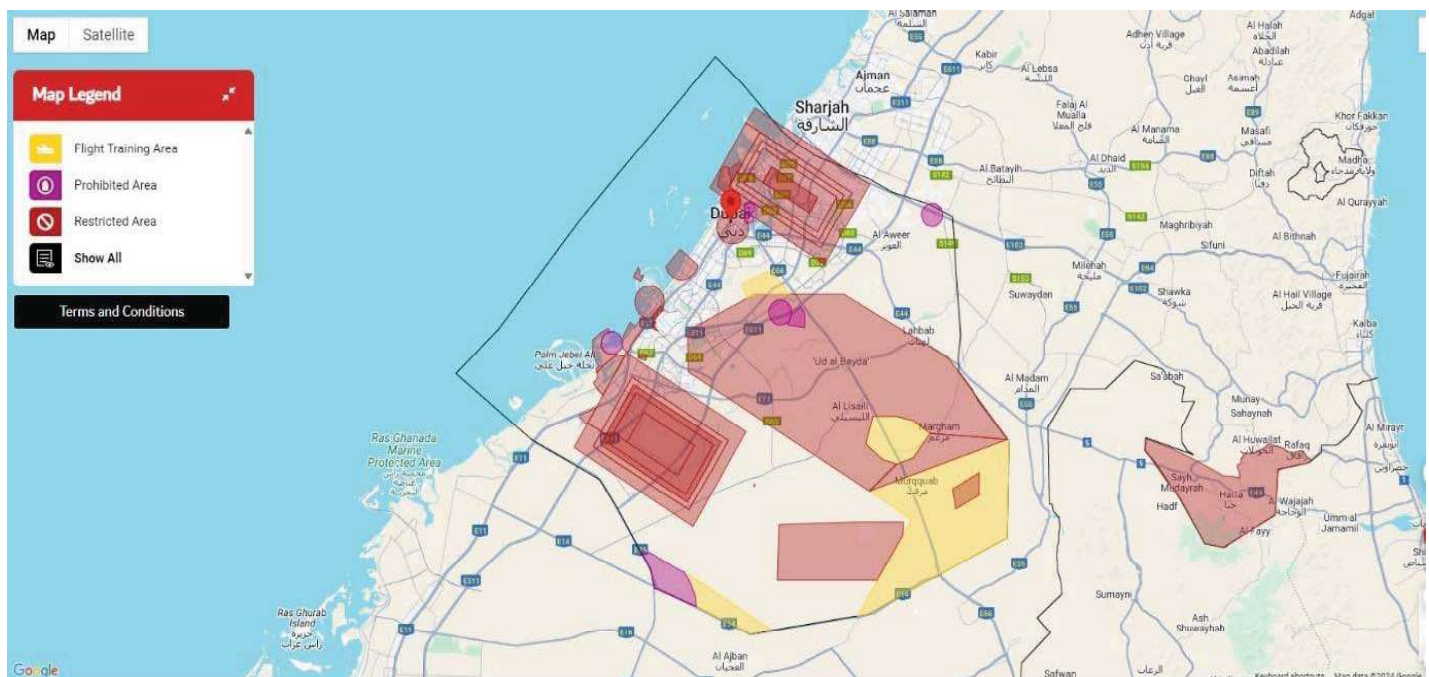

Laws and Regulations:

All related Law's and Resources which is linked directly or indirectly to the sector services and to other related aviation safety topics could be accessed through this link [DCAA - Legislation](#)

Dubai Drone Map:

Drone map is a dedicated map with detailed height and area informative layers to show the needed information to conduct any UAS and/or Drone activity in Dubai Airspace, you could access the map through the following link [DCAA - Dubai Drone Map](#)

- The Prohibited area airspace of defined dimensions identified by an area on the surface of the earth within which the flight of aircraft is prohibited to fly over.
- The Restricted area airspace in which there are special restrictive measures employed to prevent or minimize the entry in this area.
- The clear and/or green airspace area represents an area with no restriction limitation and flying in this airspace will require a pre-approval from DCAA and the concerned entities.

Customer View service form

Service description	This service will facilitate any approval request of Landing Field for Sports and/or recreational aircraft for utilizing the landing fields in Dubai for landings purposes.
Service owner	Aerodrome Safety Section.
Targeted Customer	Government to Public Sector / Government to Government.
Service type	Online based service, Service available 24/7 on system.
Service Channel	The customer could apply for the service through DCAA website only, via the following link DCAA – Application for approval of Landing Field for Sports and Recreational Aircraft
Service Form	It is online form once it is completed by the customer and submit his or her application it will be directed to the dedicated team at the business unit.

Mandatory Fields	Every field in this service form that has a red star which is considered mandatory field the customer needs to fill with a correct enquiry.
Project Name:	Is the name of the project or even the application is applied for; this name will be used in the NOC and will be used as an identification of the event applied for.
Starting and Ending date and time	This field is to specify the exact starting and ending date and timing of the activity and/or event applied for.
Event Location:	This field will allow the applicant to select the location and /or the airspace area desired to conduct his/her activity. Refer to appendix 2 Dubai Airspace map for further detail about the map.
Required Documents of the application	• Safety assessment; to address the risk and its mitigation plan. • Compliance statement: from the contractor to confirm that landing field is as per the standard. • Design Manual; to show the design and specification of the new landing facility.
Procedures & Steps to facilitate	• Go to Dubai Civil Aviation Authority website www.dcaa.gov.ae • Log in or sign up if you are a new customer. • Click on services in the upper left corner of the black bar. • Choose Approving Landing Fields • Choose Application for approval of Landing Fields for sports and Recreational Aircraft. • Fill in the required details of the service. • Pay online.
Incompliance to the requirements	If the application does not comply with the needed information, the application will be returned back to the customer allowing him to provide the needed information or documentations.
Service Fees	• 3000/- AED NOC for Landing Field Sports • 10/- AED Knowledge Dirham Fees (KDF) • 10/- AED (Innovation Fee)

Service Delivery Time	1 working day (8 hours) to complete the NOC.
Service reference	• Law No. (7) Of 2015 concerning Airspace safety and Security in the Emirates of Dubai. • ICAO Annex 14 Volume 1 Aerodromes. • ICAO Annex 19 Safety Management. • ICAO Document 9157 Part 1 Runways. • ICAO Document 9157 Part 2 Taxiways, Aprons, and Holding Bays. • ICAO Document 9157 Part 4 Visual Aids. • ICAO Document 9859 Safety Management Manual. • GCAA AMC 43 Foreign Object Debris (FOD). • GCAA CAR AIR OPS Part ORO. • GCAA CAR Part II Chapter 10 Light Sport Aircraft (LSA). • GCAA CAR ADR Aerodromes. • GCAA CAR SMS Safety Management System. • GCAA CAR Part XI Aerodrome Emergency Services, Facilities and Equipment.
Terms and condition	The service terms and condition could be accessed before applying for the service and after granting the approval of the service on DCAA website.

Terms and condition

The service terms and condition can be accessed before applying for the service and after granting the approval of the service on DCAA website.

Section4 Violations

4.1 Violations:

- A violation occurs If the customer conducted any aviation-related activity in the Emirate of Dubai without first obtaining the relevant permit from DCAA, or committed any of the acts stated in Schedule (7) of Executive Council Resolution No. (4) of 2017 Approving Fees and Fines of the Dubai Civil Aviation Authority, or miss used the certification or NOC terms and conditions, which may lead to endangering the airspace safety and/or the community. Violators will be punished as per article (3) of Executive Council Resolution No. (4) of 2017 Approving Fees and Fines of the Dubai Civil Aviation Authority. All customers/applicants shall insure continuous compliance to avoid any legal repercussions.
- Violators and any affected party may submit a written grievance through the website to the Grievance Committee on Violations of DCAA, against the decision, procedure, or measure taken against him under DCAA applicable legislation within thirty (30) days of being notified of the contested decision, procedure, or measure.

Section 5 NOTAM Issuance

5.1 Notice to Airmen (NOTAM) Description:

Notice to Airmen (NOTAM) are issued by Aviation authorities for several reasons, such as:

- Hazards such as air-shows, Drone/UAV activities, parachute jumps and glider or micro-light flying, etc;
- Flights by important people such as heads of state;
- Closed runways, taxiways, etc;
- Unserviceable radio navigational aids;
- Military exercises with resulting airspace restrictions;
- Unserviceable lights on tall obstructions;
- Temporary erection of obstacles near airfields (e.g. cranes).

For reasons of conciseness and precision, NOTAMs are encoded, although the code is usually sufficiently self-evident to allow the user to identify a hazard.

NOTAMs are communicated by the issuing agency using the fastest available means to all addressees for whom the information is assessed as being of direct operational significance, and who would not otherwise have at least seven days' prior notification.

Flight Crew Access to current NOTAMS during pre-flight planning may be via airport Flight [Briefing Facilities](#) provided for all aircraft operators or via an alternative 'tailored access' system provided by their Company which will provide access only to NOTAMS relevant to their intended flight
